1F Series

ANSI Grade 1
Keyless Lock

Facial Recognition Smart Lock

Your Smartphone as Key and Recognition Device

- Mobile APP can be downloaded, easy to use and learn.
- Biometric recognition prevents embezzlement.
- Provides a multiple security protection, unlocking via single passcode input or fingerprint verification; an additional face verification can be added for applications that require a higher degree of confidentiality.
- Users can set up their passcode, fingerprint and face verification data on their own.
- Low-battery notification on your smartphone.
- Override key allows access during power failure or malfunction.

Smartphone Mobile Management

- Using AES encrypted data transfer mechanism, the administrator's smartphone can add, delete and modify access rights as well as full access to all users' audit trails.
- No inconvenient network cabling for a centralized server management (optional).
- No need to centrally store all biometric verification data (stored at each user's end).
- Suitable for family members, office employees and short or long-term visitors/tenants.

- Your smartphone is your digital key and recognition device
- Cloud-based authorization for mobile management
- Fast and easy operation with a fast facial recognition time of less than 1 second
- Passcode/Fingerprint* and facial recognition provide a multiple security protection
- Traceable audit trails and low-battery notification
- Override key allows access during power failure or malfunction

*Currently the fingerprint function is only available for iOS devices with fingerprint verification.

i Series

ANSI Grade 1
Standalone

Keyless Lock

Security and Convenience Within Your Reach

The **i** Series Standalone Keyless Lock has NFC (Near Field Communication) and Bluetooth signal receivers built in. With the mobile app Appkey® installed in a smartphone with NFC/Bluetooth capabilities, this new technology can replace keypad, fingerprint, magnetic stripes and key as forms of unlocking your door. Furthermore, not only the **i** Series Keyless Lock can provide you with security and convenience, but it also has a management platform that no other brand in the market can offer.

Application:

homes, offices, hotels, clinics or other small or medium businesses.

Strong and Durable Fire Exit Devices

- Made to comply with the highest safety and security standards in industry.
- UL/cUL listed for panic hardware or 3-hour fire rated exit hardware.
- Certified to ANSI/UL305 and ANSI/BHMA A156.3 Grade 1.

Extra Heavy Duty

Cylindrical Lock

Exceptional Design and Performance

This product has been designed, tested and verified with the goal of not only conforming to the strict requirements of ANSI/BHMA A156.2, but exceed them. Klacci is proud to present you with a product that surpasses all limits.

The LF Series Cylindrical Locks have been designed using advanced design concepts and the most rigorous of testings, taking product quality to a whole new level of performance and durability.

Enhanced Door Security

M1

Series

ANSI Grade 1

Heavy Duty

Mortise Lock

All bolts are made of stainless steel with most working parts inside the case made of high strength steel alloy.

It is UL listed for 3-Hour fire rating and meets/exceeds the ANSI/BHMA A156.13 Grade 1 specification.

M Series

Heavy Duty

Anti-ligature Solutions

Providing a Safe Environment

Our conical lock designs with sloped surface prevent ligature attachment, thus providing a safer environment. Complying with ANSI/BHMA A156.13 testing standard requirements, the lever handle design includes a clutch function, increasing the lock's durability as well as the overall safety.

HL Series

ANSI Grade 1

Specialty Hardware

Push/Pull Trim

Fast and Convenient Way to Open Doors

In certain applications, such as hospital rooms, turning doors may become an obstacle when making an ingress or egress. Klacci has developed a paddle-shaped handle designed in such a way to eliminate the need for holding on the door handle, which allows medical personnel to open doors in a fast and convenient way. Simply push or pull with any part of your body and see how easy it is to open a door without your hands.

FB Series

ANSI Grade 1

Door Hardware

Flush Bolts

Automatic Flush Bolts

Inactive door locks and unlocks automatically when active door is opened or closed.

Self-latching Flush Bolts

Flush bolt is manually retracted to release inactive door. Bolt latches automatically once released.

Manual Flush Bolts

Bolts are retracted and latched manually by sliding or turning the lever or snib.
