Speed Gate

Model: PFB-Z2689A

Klacci's Speed Gates, along with our vast variety of access control or touchless solution products provide quick and secure access control for a large range of applications.

The stainless steel housing with customizable width of transparent glass provides an aesthetically appealing design for any access checkpoint. The glass barriers swing open as a person approaches in either direction. The glass barriers close immediately once the person has passed through them.

- Compatible with one-way or two-way access.
- Automatically determines entering direction and prevents tailgating and pinching.
- Configure the security level of the checkpoint based upon the requirements by setting up with Klacci's keypad readers, biometric readers, mobile access devices or touchless quick pass mechanisms.
- Width of glass barrier is customizable to make the access checkpoint in any size.
- Option of installation base for temporary installation and placement.

Specification
